PROFESSIONAL EXPERIENCE

Freelance Data Analyst July 2025 – Present

- Provide ad-hoc data analysis and visualization using google sheets and tableau to offshore clients, utilize Python for data cleaning and advance statistical analysis.

Business Analyst · Greenergy Development Corp. July 2024 – July 2025

- Utilized JavaScript with **Google Apps Script** to design and develop a tracking and approval system using the Gmail API, automated 6 procedures across the finance and procurement department. Streamlined processes with a data-driven approach for bottleneck analysis, resulting in improved workflow efficiency
- Designed a data retrieval algorithm and developed dashboards in **Google Sheets** and **Tableau** that allowed the top management to monitor **KPIs** and **KRAs** of each department which resulted in **20%** faster completion of deliverables
- Perform **ad-hoc data analysis** and data-driven recommendations to C-level executives and department heads for business problem solving and analysis

Jr. Data Engineer · Climbs Life and General Insurance Cooperative March – June 2024

- Designed and optimized a deduplication algorithm for **12M** rows of data using Python that minimized client information search workload and data inaccuracy by approximately 30%
- Collaborated with a team of data scientists to design an **ETL** pipeline for scraping text data from 350 PDF files and a data cleaning process that utilizes regex to meet project constraints

ACADEMIC BACKGROUND

Bachelor of Science in Data Science Cum Laude
University of Science and Technology of Southern Philippines

TECHNICAL TOOLS

Languages	Python, SQL, JavaScript
Developer Tools	Git, JupyterLab, VS Code, Google App Script, Streamlit, Google Workspace
Data Visualization	Tableau, PowerPoint, Excel, Google Sheets

PROJECTS

Data visualization of PH REITs using Tableau for financials & operational performance tracking

- Gathered the data from tradingview, investing(dot)com and the company investor relations annual report and stored it in Google Sheets
- Utilized Tableau to design a dashboard for tracking both annual and quarterly revenue, dividend payments, EBITDA margin, GLA and other key REIT metrics.

Optimizing U.T.I Diagnosis with Machine Learning & A.N.N for Reducing Misdiagnoses

- Designed the objectives, methodology pipeline and system architecture of the study
- Designed a custom data retrieval algorithm to extract and load the required data from various sources
- Implemented hyperparameter tuning using Optuna framework and built a hybrid voting ensemble model with optimal hyperparameters
- Designed a data validation pipeline and integrated a MySQL database to the web application
